TITLE	Community-Technical Colleges of Connecticut Fall 1993 Enrollment.
INSTITUTION	Connecticut State Board of Trustees of Community-Technical Colleges, Hartford.
PUB DATE	94
NOTE	23p.; For 1991-92 statistics, see ED 351 084.
PUB TYPE	Statistical Data (110) -- Reports - Research/Technical (143)
EDRS PRICE	MF01/PC01 Plus Postage.
DESCRIPTORS	Age Groups; College Attendance; Community Colleges; *Enrollment; *Enrollment Trends; Full Time Equivalency; Full Time Students; *Institutional Characteristics; Minority Groups; Part Time Students; State Surveys; Statistical Data; *Student Characteristics; Technical Institutes; Two Year Colleges
IDENTIFIERS	*Community Technical Colleges of Connecticut

ABSTRACT

Consisting primarily of tables and graphs, this document provides fall 1993 enrollment data for the 12 colleges in the Community-Technical Colleges (CTC) of Connecticut. Following a brief narrative, the following data is presented: combined fund full-time equivalent (FTE) enrollment, fall 1992 and fall 1993; combined fund enrollment, fall 1989 through fall 1993; general, extension, and combined fund enrollment for full- and part-time students, fall 1993; combined fund age, sex, and ethnic group distribution for full- and part-time students, fall 1993; program enrollments by sex, fall 1993; systemwide program enrollment percentages, fall 1993; and combined fund geographic distribution, fall 1993. Highlighted findings include the following: (1) systemwide, the CTC enrolled 45,542 students in fall 1993, down from a record high of 45,655 in 1992; (2) from fall 1992 to fall 1993, general fund enrollment increased by 1.1%, combined fund enrollment decreased by less than .25%, and the FTE count decreased by 1%; (3) minority enrollments increased in fall 1993 to 20% of the student body, with African American and Hispanics representing nearly 18%; (4) enrollment by gender remained constant at 61% women; (5) the average age within the system was 29 years with 25% of the students falling into the 20-24 year category and 40% in the 20 and above category; and (6) new students made up approximately 33% of the student body, a decrease of 1.5% from 1992. The Community-Technical Colleges of Connecticut

Education that works

- **More than 45,000 credit students are served by the Community-Technical Colleges.** This represent 51.4% of the undergraduates in Connecticut public higher education; thousands of additional students are served in non-credit vocational, skill building and job training courses.

- **Community-Technical Colleges offer degrees and certificates in over 100 areas.** Associate degrees and certificate programs in business, technology, health careers, public service and liberal arts/general studies provide Connecticut's citizens with the skills to equip themselves to be economically viable in Connecticut's complex economy.

- **Community-Technical Colleges are a primary point of access to higher education.** In the past, women and minorities have often been denied access. These are the students served in large numbers by the Community-Technical Colleges. They will also be the majority of the new entrants to the work force in the next decade.

  - **More than 60% of Community-Technical College students are women.**

  - **The system enrolls more than 66% of the Black and Hispanic undergraduates in public higher education.**

- **The fastest growing segment of the state's population is the Hispanic population.** Connecticut's growing immigrant population and other non-English speaking residents seek English language and literacy skills in the colleges' acclaimed English-As-A -Second Language (ESL) programs.

- **30 is the average age of a Community-Technical College student.** This underscores the vital role the colleges continually play in training and retraining the state's adult work force to meet the needs of business and industry in a rapidly changing economy.

- **Technology is increasing the complexity of most of today's jobs.** More and more jobs -- a significant majority -- will require education beyond high school; but only about 2 jobs in 10 will require a four-year college degree.

- **Tech Prep encourages students to prepare for careers in technical and health areas.** These programs, run in conjunction with local high schools, vocational-technical schools and Connecticut employers, develop a coordinated study program combining the last two years of high school with the first two years of college.

- **A technically skilled, well-trained work force is essential for a prosperous economy.** The need for basic math and literacy instruction is more essential now than ever. In 1993, more than 70% of entering students tested required some developmental coursework in either math or English.

- **Access to higher education is part of a world class educational system.** Declining General Fund support since 1989 and increasing enrollment demand have required the colleges to impose dramatic increases in tuition and fees. All of these factors threaten to limit access to higher education at a time when education is more essential than ever. The state's future and the future of its citizens depend on ***education that works*** to support human and economic development.

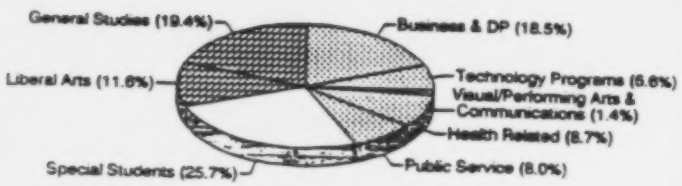
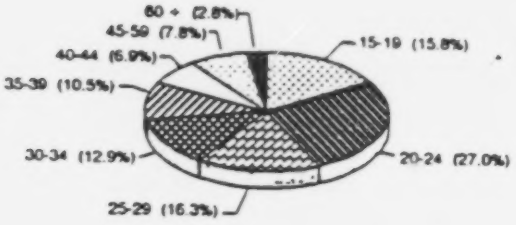
The Community-Technical Colleges of Connecticut

Fall 1993 Program Enrollment



High School Partnership Programs allow high school juniors and seniors to broaden their education, earn college credit, and investigate career opportunities by taking courses at the community-technical colleges.

Age Distribution - Fall 1993



English as a Second Language

As Connecticut's minority population has increased, the colleges have developed highly successful English As A Second Language Program to make higher education accessible for non-English speaking groups.

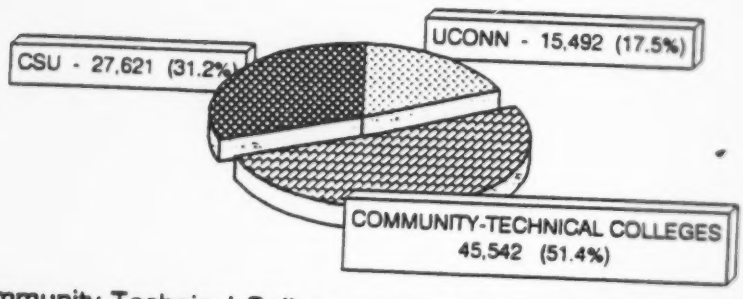
COMMUNITY-TECHNICAL COLLEGES OF CONNECTICUT

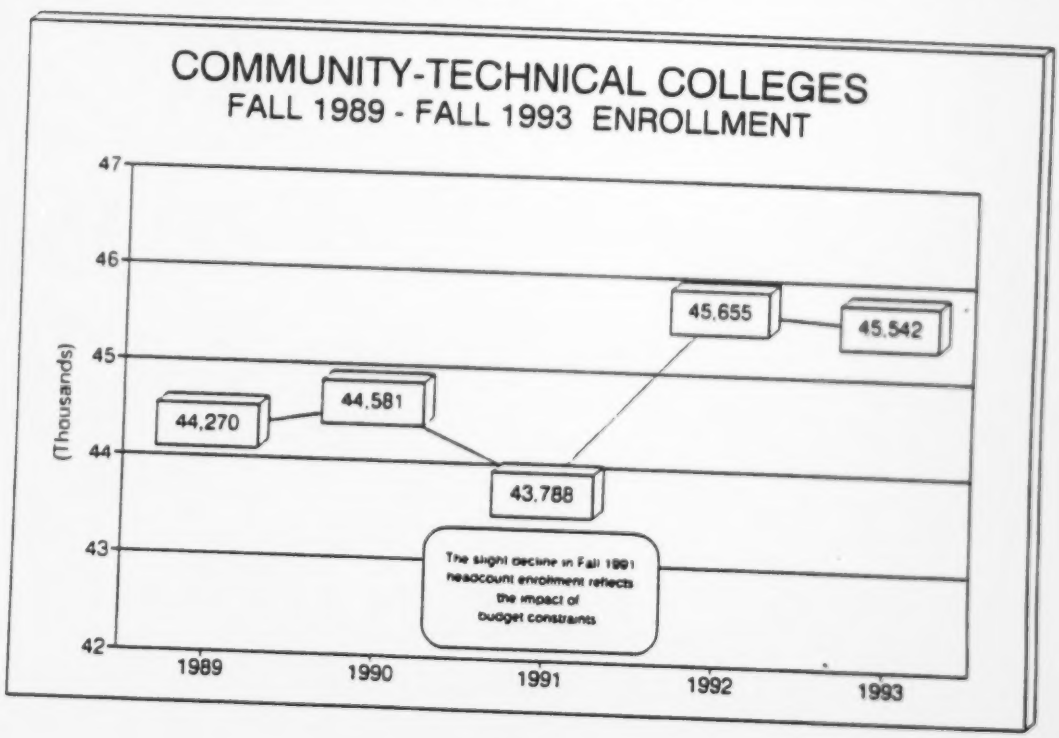
FALL 1993 ENROLLMENT

The Community-Technical Colleges (CTC), the largest unit of undergraduate higher education in the state, served 51.4% of all undergraduates in Connecticut public institutions in the Fall of 1993.

UNDERGRADUATES AT PUBLIC INSTITUTIONS
FALL 1993 HEADCOUNT ENROLLMENT



The Community-Technical College system enrolled 45,542 students this Fall 1993, down from the record high of last year of 45,655; however, General Fund enrollment increased by 1.1%. The decline in the Combined Fund enrollment was less than one-quarter of one percent, with full-time enrollment decreasing by 3.1% while part-time enrollment increased slightly by just under 1%. As a result of this fluctuation, the FTE count decreased by 1% to 22,178.



The colleges show variations in both headcount and FTE enrollment providing no clear picture of a particular trend. When you look at the five year trend line of the individual colleges it is apparent that most of the colleges are cyclical with minor increases or decreases and essentially stable averages. Exceptions to that rule might be found at Naugatuck Valley, Gateway, Asnuntuck and Norwalk which all showed steady increases over that period.

Minority enrollments in the system have increased to 20% of the student body this year; African Americans and Hispanics alone represent nearly 18% of the student enrollment in the system. Last year, the total minority enrollment was just over 19%. Gender distribution across the system remained constant with 61% women and 39% men.

The average age within the system is approximately 29 years of age with the largest percentage of students, 25%, falling into the 20-24 year age bracket while 40% of our students are age 30 or above. The average age of part-time students continues to be significantly older than that of full-time students (31 vs. 23 years of age). The percent of senior citizens (60+) among those enrolled remained at just under 3%.

New students (not necessarily Freshman) make up approximately one-third of the total enrollment in the system, down about 1.5% as compared to the proportion of new students in last year's enrollment figures. It appears that a contributing factor to our enrollment stability is the proficiency of the colleges to enroll new students while retaining existing students.
